- HR Best Practices incorporated in the software
- Organizational Hierarchy with reporting relationships
- Configurable approval process
- Scalable from 50-50,000 employees
- Easy & quick implementation with no added cost
- Committed support every step of the way
- Extremely Cost-effective
- Stable, user-friendly and comprehensive

# 8 Reasons - ubiHRM is better than SAP

S No.	Key points	SAP	ubiHRM
1.	<b>Implementation</b>	Lengthy implementation time - typically 4-6 months	Quick implementation within a few hours. No extra cost
2.	<b>Customization</b>	Non-customizable software. Does not flex according to the needs	Highly customizable software. Use the way you want.
3.	<b>Pricing</b>	Ranges between \$75,000 – \$750,000 and regularly requires high upgradation charges	Extremely Cost-efficient solution - Less and affordable upgradation charges
4.	<b>Manpower</b>	Demands Highly Trained Staff to run the complicated software	Easy to find and train staff in very less time.

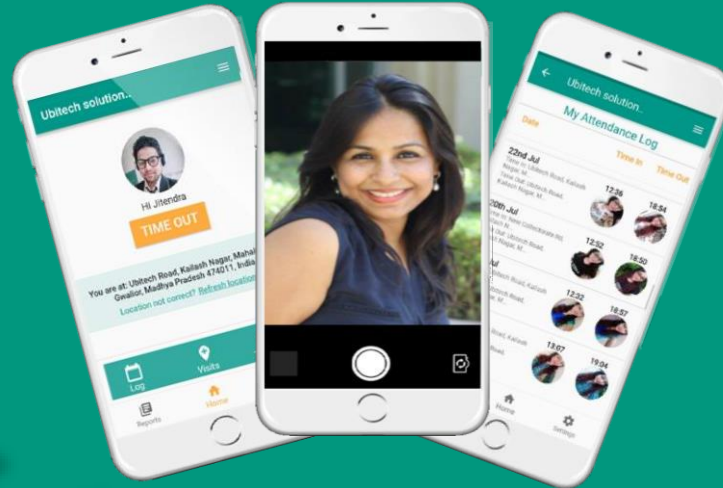

# 8 Reasons - ubiHRM is better than SAP

S No.	Key points	SAP	ubiHRM
5.	<b>Ease of use</b>	Highly complex. Maintenance of the software is very difficult	The usage is super easy and flexible as a not so skilled worker can also perform well
6.	<b>Mobile Friendliness</b>	SAP mobile application lacks features and is not popular	Highly user friendly mobile application. Specially crafted for on the go employees
7.	<b>Training &amp; Support</b>	Offers limited training & support - only at the time of implementation. Training & support are charged	100% Free training & support for customers anywhere, any no. of times
8.	<b>Scalability</b>	Complete HRMS - even the modules that are not required - has to be purchased	Totally scalable. Buy only the modules that you require. Unwanted modules can be skipped

# Track Attendance & location of Employees – 24x7

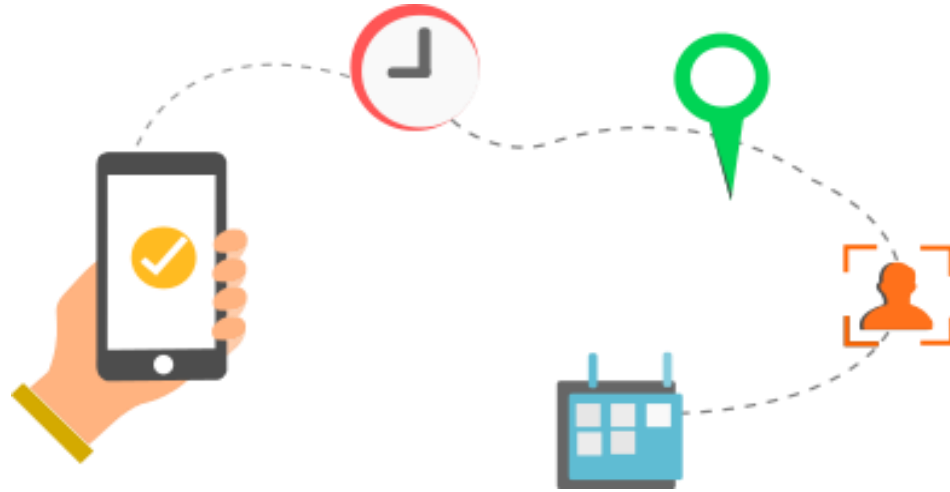

4 way track – User ID + Time + Selfie + Location

# Global Time and Attendance Software Market

- The global time and attendance software market size was valued at \$2,156 million in 2020, and is projected to reach at \$5,312 million by 2030
- Increase in need of shift toward cloud-based time and attendance software
- Increase in adoption of touchless time and attendance software during the Covid-19 pandemic
- Increase in demand from small and medium-sized organizations
- Lowering down the manual and error prone data entry
- Shift towards implementation of automated attendance software for improving payroll accuracy
- The adoption of “work from home culture” in organizations due to closedown of offices and facilities
- Adoption of phone based attendance tracking system or App

**ubiAttendance App offers the surest way to track Staff Attendance with selfie, time and location**

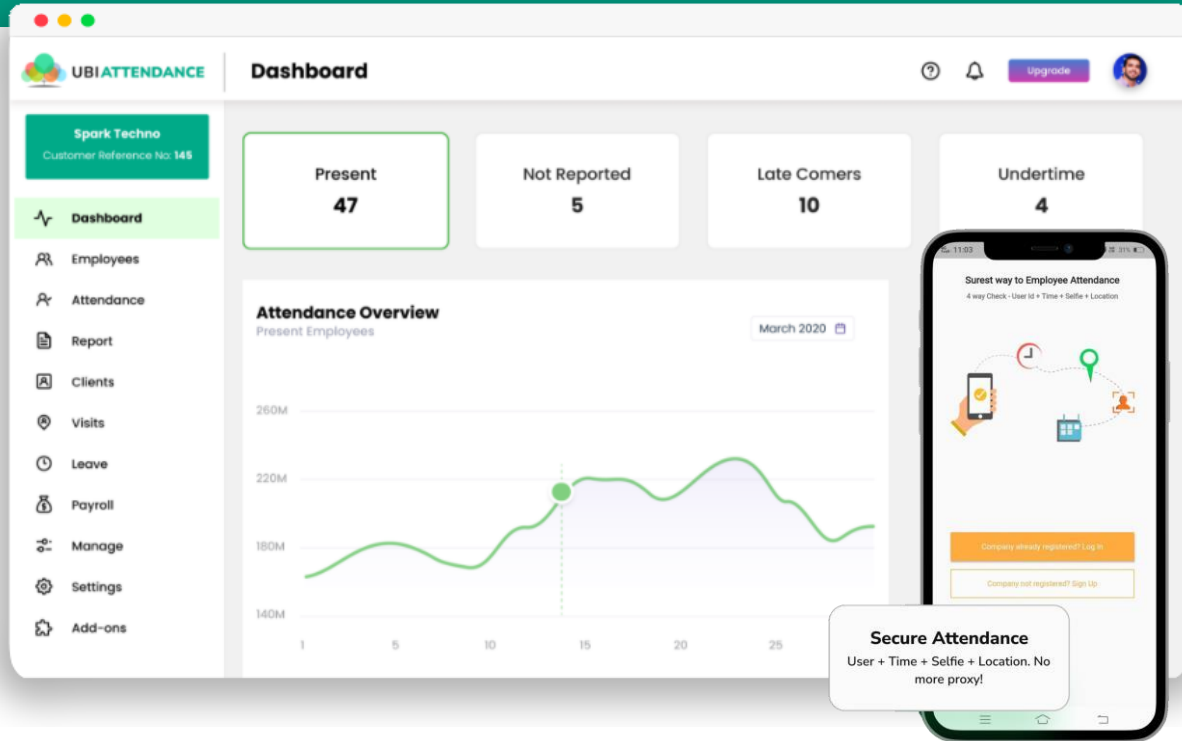

# Foolproof Attendance on Mobile Devices & Desktops

Best 2 in 1 Attendance App.  
Convert your Phone to a  
Biometric Face Attendance  
Machine

Apple Store link: <https://apple.co/3atkee0>

# The Opportunity!

## HIGH COST

For small Organizations with few Employees Machines become costly.

## OBSOLESCENCE

The Machines have to be replaced frequently. Updates are not possible.

## MANAGE COMPLEX SHIFTS

There is no way to manage multiple Time In/ Time out, Flexi shifts

## ERROR PRONE

Prone to buddy punching & manipulation of Attendance data.

## RIGIDITY

The existing Attendance cannot be scaled up to include Payroll or Performance management.

## NO CENTRALIZATION

It is very difficult to have the Attendance data from multiple locations in one place.

# Our Value Proposition

## Why UBI Attendance?

1

### 100% made in India

Totally made & served in India by Indians. In Top 10 Apps out of 1,342 entries in App Innovation Challenge of Digital India

2

### Anywhere, Anytime

Unlike biometric machines, bugs & updates are free. Attendance can be marked anytime, anywhere. No office space required.

3

### Touchless Attendance

Employees don't prefer to punch attendance from a common machine – specially in the pandemic times.

4

### Works in Villages/Remote areas/Oil Rigs

No service is available for traditional attendance machines .

5

### Cutting Edge Technology

Future ready application. Developed on Google platform. Dynamic architecture. Friendly UI.

# 4 way check on Employee Time Attendance

Checks Identity

Tracks Location

Checks Selfie

Email Support

# Manufacturing Industry – Biometric Attendance Machine

Mobile Phones can be used as a Biometric Face Recognition Attendance Machine.  
Works very well for blue collar employees because there is hardly any training required.

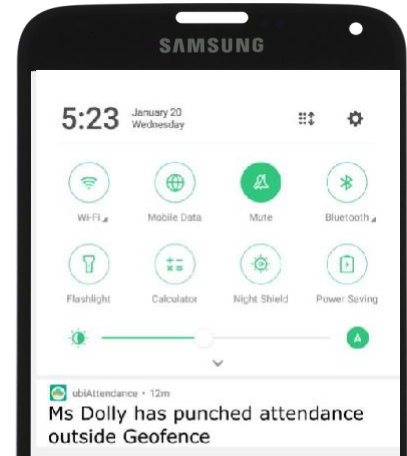

# Road Projects – Geo fence

The Project's site keep on changing.

Through the App the attendance can be punched & captured from anywhere.

Geo-fencing can be applied to ensure that attendance is punched from the project site only.

Miss Dolly has punched the attendance outside the Geo fence

# Construction Sites – QR Code Attendance

There are no fixed entry points at sites, so the traditional biometric machines cannot work. Employees can scan their QR Codes to punch attendance on the Supervisor's phone

# Education Segment – Team Attendance

Phone can be provided to each class. The class teacher can take the attendance of all the students in Group mode. No need of maintaining attendance registers.

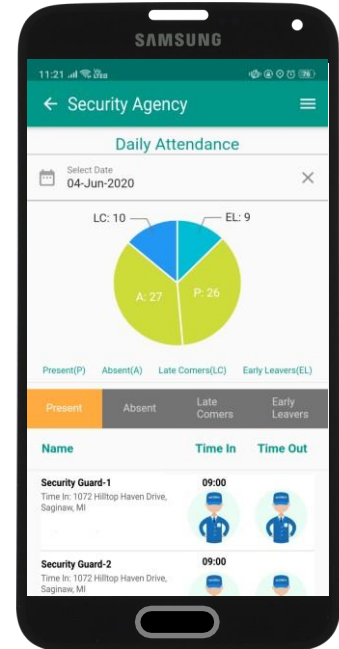

# Security Agencies – Check Anywhere, Anytime

The supervisor can check the staff's attendance on phones in his office or when he is moving.

The clients can also access the attendance to ensure the security guards are present.

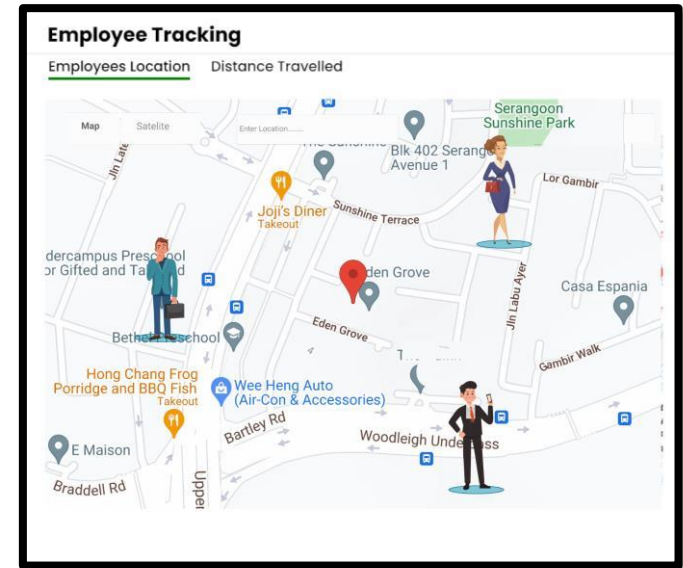

# Pharma Industry – Sales Staff Tracking

Pharma Industries employ a lot of medical representative and sales field staff. The staff can punch the visits from their phones.

The managers can easily track the field visits on phone.

# Material Handling Equipment Rental Industry

The Machine operators can be provided phones with ubiAttendance App.

The accuracy of contractual manpower work hours can be established.

This will help the vendors in timely processing of their invoices.

# Integration

Attendance Software integrates seamlessly with major ERP, & HR Software players. Our REST-API allows you to seamlessly integrate ubiAttendance into your existing software

SAP
